Objective

I'm finishing up my AEC in Full stack Development on April 11th and I'm currently looking for a stage or employment opportunity in either front or back-end web development. I'm most comfortable with **Java**, **CSS with Bootstrap** and **Material-UI**, and the **MySQL/express/react/node.js** stack. I'm eager to learn new things and will be happy to develop new skills when necessary. I'm excited to start the next phase of my learning adventure and look forward to growing into a productive and valued member of your team.

Personal Highlight

From 2013 to 2016, I voluntarily managed a crew of 20 producing an annual project for an art festival in the Nevada, USA. For this project, I managed the budget, logistics, fabrication, and construction of multiple onsite structures. In 2014, I left Los Angeles to take a 3-year sabbatical leave to travel, volunteer around the world and gain knowledge in sustainable living, growing, and building practices. I then immigrated to Québec to be with my wife and I'm now ready and excited to reintegrate into a new career.
